

# THE CHAMPION CHRONICLE

VOLUME 7

CHAMPION, (Alberta) THURSDAY, MAR. 18, 1926

## SAVOY CAFE

Our patrons say we are giving the best meals and service that has ever been available in Champion. Our prices, too, are recognized as very reasonable. We feel sure we can convince you this estimate is correct, and suggest a trial at least.

Leo. M. Roberts.

## Dr. R. R. McIntyre

DENTIST  
714 Herald Block, - Calgary.  
Will be in Champion every Thursday  
day each week.  
Appointments may be arranged at  
Moffatt's Hardware.

## J. FRED SCOTT LL.B.

Barrister, Solicitor, Notary Public,  
of 213 Lancaster Building Calgary,  
afternoon and evening, in old Municipal  
office.

Meets second Thurs-  
day in each month. Visiting brethren  
welcome.  
CHAS. McLEAN, E.E. CRAWFORD  
W.M. S.R.

## Hospital Bylaw

### Voted Down

Following is the result by  
polls of the vote on the hospital  
bylaw on Monday. It will be  
observed that even the rural  
portions of the district failed to  
carry the bylaw:

Poll	For	Against
1. Daugherty .....	1	50
2. Champion .....	2	215
3. Harmony .....	24	41
4. Roe's .....	6	27
5. Alton .....	8	32
6. Larson .....	16	0
7. Corrigan's .....	10	10
8. Kirkcaldy .....	9	42
9. Peace .....	22	6
10. Esauja .....	35	14
11. Vulcan .....	845	12
12. In the Wilds .....	2	5
13. Dewar's .....	32	5
14. Berrywater .....	37	0
15. Smith's .....	28	5
16. Red Cross .....	44	5
17. Sunset Valley .....	13	1
Total .....	688	310

The result at Champion and  
many other polls was due to  
the efforts of W. C. Hoskins,  
Forrest Cool, G. F. Smith,  
Mayor Mark and several others  
who attended all of Mr. Whis-  
ton's meetings and also ar-  
ranged for polling the anti vote  
in this and adjoining polls.

Final figures on the salmon  
pack of British Columbia for  
1925, issued recently by the  
Canadian Manufacturers' as-  
sociation, show that in only one  
year in the history of the pro-  
vince has the total pack been  
greater than last year. Al-  
together 1,719,282 cases of sal-  
mon of all varieties were turned  
out in 1925 by plants on the  
British Columbia coast. In 1924  
the total was 1,745,313 cases.

Everyone is making prepa-  
rations for spring and the  
weather certainly would in-  
dicate that more or less seed  
would be necessary to keep up  
with the advance of the season.  
However, the farmers are not  
anxious to begin operations be-  
fore April, at least.

The noted Commercial Grad-  
uates Basketball Team, of Ed-  
monton, ladies world's cham-  
pions, will leave shortly for  
Eastern Canada and the U.S.,  
where a series of exhibition  
games will be played during  
Easter week at Toronto, New  
York, Philadelphia and other  
points.

From every direction farmers  
have been urged to have their  
seed grain tested where the  
grain was exposed to the bad  
weather last fall. The trouble  
involving is very slight and  
might easily prevent serious  
loss in sowing grain until for  
seed.

Dr. Freeze has been ill for the  
past two weeks with an attack  
of erysipelas. On Wednesday  
night Dr. Bouck, of Calgary,  
was called in consultation with  
Dr. Lyster, of Carmanagay, and  
at the time of going to press  
the doctor is stated to be im-  
proving.

The Vulcan correspondent  
who is responsible for the "dry  
area" idea should have looked  
over the vote a little more  
carefully before committing  
himself. Kirkcaldy, six miles  
from Vulcan voted 42-9 against  
the bylaw. Isn't that rather  
close for a "dry area."

Farmers in the province who  
have not yet secured their seed  
for the coming season, are ad-  
vised that registered seed grain  
can be secured through the pro-  
vincial government cleaning and  
grading plant at Edmonton,  
and that orders for such should  
be placed with W. J. Stephen,  
Field Crops Commissioner, De-  
partment of Agriculture, at  
once.

The Beaver and Stacey lum-  
ber yards will be gradually uni-  
ted in the Stacey yard and many  
improvements to the latter are  
under way. The manager, C.  
McLean, assures us that the  
decreased overhead of operat-  
ing two yards will permit of  
better service to patrons and  
at the same time of better val-  
ues to the extent of the saving  
effected.

More U. S. farmers are turn-  
ing their eyes to Canada than  
at any time since the war broke  
out. Hundreds of farmers are  
going to cross the boundary to  
a place where they can buy  
land for their own, something  
they cannot do in the areas of  
high priced land throughout  
the agricultural sections of  
the United States.—Lethbridge  
Herald.

W. C. Fry, of Grandview,  
Wash., returned to Champion  
this week and will visit here for  
a time. Mr. Fry states he has  
no intention of parting with  
his land here as he has met  
with no other investment in his  
travels which promised equal  
returns. While there are many  
rich people in the state he re-  
sides in, the people who work  
are altogether too numerous  
for the jobs available and are  
not prosperous.

What purports to be cor-  
respondence from Champion in  
the Calgary Alberta makes  
some very serious charges in  
regard to the poll here on Mon-  
day, based on the statement  
that there were only 95 rate-  
payers on the roll, while 217  
votes were recorded. At the  
last Dominion election there  
were 224 names on the list of  
voters for the Champion poll.  
To this 24 sections were added  
for the vote on the bylaw.  
While many who qualify for  
Dominion elections could not  
vote on the bylaw there were  
also a number of those who  
were not citizens who qualified  
as ratepayers.

The correspondent of the  
Albertan quoted Champion  
ratepayers only, ignoring 60  
sections of land included in the  
village poll. It is a pity that  
any person would go to such  
lengths to indulge a petty spite.

Mrs. Geo. Stoddart enter-  
tained the young girls on Wed-  
nesday evening at her home.  
The party was given as a fare-  
well to Margaret Reid. The  
girls presented Margaret with  
a beautiful set of French ivory  
perfume bottles. A jolly eve-  
ning was spent and the girls all  
decided that Mrs. Stoddart was  
a splendid hostess.

The service at Blusson school  
for Sunday next, March 21, will  
be withdrawn, as Mr. Lee  
wishes to attend a congrega-  
tional meeting at Alton that  
afternoon.

## For Spring Work

Advertisements of Wanted, Lost, Found, Stayed, etc., not exceeding one inch, 50 cents for first insertion, 25 cents for each subsequent insertion.

Commercial rates on application.

THURSDAY, MAR 18, 1929

## NOTES AND COMMENT.

The defeat of the municipal hospital bylaw on Monday will naturally produce no mourners in this district. The scheme at large was not at any time as particularly in the interests of the individual ratepayer as it was in the interest of the point of its location. If the hospital district had been larger and the levy for its construction and operation very much less, the scheme would not have aroused the opposition which put it in the background on Monday. In the effort to construct a favorable district the utility of the hospital was lost sight of and the extent of the necessary levy prejudiced many times as much as it might otherwise have been favorable to the scheme. The suggestion is thrown out that a new district will be formed, leaving out the southern portion of the old territory. It may be possible to carry a bylaw in such a curtailed district but even this is very doubtful. As presented to the ratepayers the scheme was neither sound nor practical except at unusual expense. It had the earmarks of a scheme to herd the people into a hospital they did not want to patronize somewhat on the principle that Indians are kept on reservations. Why the government should attempt to put such a proposition over is hard to understand. Even the vote at Vulcan cannot be twisted into an endorsement of the hospital scheme but simply an endorsement of the location of a \$40,000 plant at Vulcan.

"Municipal Hospital Scheme Defeated by Vote in Dry Area," is the remarkable heading of a news article in the Lethbridge Herald referring to Monday's vote. If the Herald's correspondent was responsible for this heading it might be intended as a withering reflection upon Champion and district, but if the office was responsible it is more than likely environment was the cause.

## The Duty on Automobiles

The following extracts from an article by R. J. Deachman may be found interesting:

Total salaries and wages paid in the Canadian automobile industry amount to \$14,219,137. Wages totalled \$10,958,202—salaries \$3,280,935. Total employees on salaries and wages were \$9,277. Wages and salaries combined amounted to a trifle in excess of 16 per cent. of the value of the product. The protection therefore is of 35 per cent. That is to say, the total wage bill. That is to say, absurd as it may seem, in trying to aid this industry we give it sufficient to pay its entire wage bill twice over. The excess price paid for cars by the Canadian people is enough to pay the wages on all cars produced in Canada and still leave \$5,700,000 over. Note the phrase "all cars produced in Canada." We export over \$31,000,000 of the \$38,000,000 produced so the excess price charged pays the wage cost of producing the cars for Canadian use plus the wage

cost of the cars exported and leaves more than \$5,000,000 after that. Was over every largeness handed to any industry?

There is not a country into which our exports do not penetrate. In 1921 we even sold the U.S. a million dollars worth of cars. Our automobiles go to France, Spain and the Argentine. They are driven by Negroes in Jamaica, Arabs in Palestine and Syria and Turks in Turkey. Well and good. Over 80 countries have seen this product of Canadian industry. Apparently our manufacturers can compete in these countries with the manufacturers of the world. The Ford can go any place—it fears no evil—but if it moves from Ford out to Windsor it cannot live without the artificial respiration of a 35 per cent. tariff. On all cars exported the government of Canada rebates the duty paid on raw materials. That is right. We want to see our cars exported. We are proud of the automobile industry in Canada—but the car is a necessity. It is in the broadest sense an agricultural implement. The duty upon the raw material raises to the cost of producing the car—the rebate enables the manufacturer to get into the foreign market a lower cost but why should a Canadian government discriminate against the Canadian people by maintaining conditions which force an artificially high price for automobiles when the auto has now become in the broader sense a necessity of life. With the duty on agricultural implements running all the way from free to 20 per cent. what justification can there be for maintaining a duty of 35 per cent. on another article almost equally necessary.

Announcement is made that the Great Northern Railway will construct a hotel at Waterton Lakes Park, south-west of Lethbridge, to cost one million dollars with accommodation for 500 guests. The hotel will be close to the international border, and Glacier Park in Montana.

## Early Chickens

(Experimental Farms Note).

Chickens have been hatched for two years at the Experimental Station at Rosethorn from late February till late May. Of course to get chickens before the first of May it is almost necessary to use incubators as very seldom do hens become broody before the first of April. From both years it has been observed that pullets hatched before the middle of March begin to lay in July and August, then pass through a partial moult and do not begin again till late in the winter. Pullets hatched in April, however, usually begin laying in late October or November or December and continue regularly until spring. May hatched pullets seldom begin laying before January or February and in most cases not until March. May hatched pullets seldom develop to sufficient weight for the best market for roasters which is in November and December.

If there were a good market for broilers the earlier hatched chickens could be easily and profitably disposed of in this way but in most parts of the West there is no such market.

Another objection to the February and March hatches is the greater expense of brooding due to cold weather. Then too, chickens raised indoors liable to develop leg weakness and related troubles.

All things considered it has been found that best results accrue from April hatched chickens.

## Brooding Chickens

(Experimental Farms Note).

The following practice is followed at the Dominion Experimental Station, Lacombe, Alberta, in connection with brooding chicks. The chicks remain in the incubator for the first twenty-four hours. The second day they are transferred to the brooder house where they are reared under cool

burning colony brooders. This type of brooder house gives good satisfaction at this Station. Uniform temperature is easily maintained when the stove is operated properly. No feed is given until the chicks are forty-eight hours old. Feed lightly for the first week as overfeeding causes bowel trouble. The third day the chicks are given a little fine bran, chick grit, and salt to eat. From the third day until two weeks old the chicks are fed the following ration every two hours each day: Equal parts fine bran, shorts and oat chop free from hulls. To this is added a small quantity of chick grit and cod liver oil. A little fine cracked wheat is fed in the litter morning and evening. Butter milk is before the chicks

Your Requirements  
For the Spring's Work

Whether it be on the farm or in the house have all been anticipated at this store. If its anything in the hardware line its here. We take just as much pride in the completeness of our stock as in its consistent high quality. Repairs, etc., not carried in stock will be secured with the utmost expedition.

Give Our Service a Trial.

## W. C. HOSKINS

Guaranteed Hardware.

The values being offered at this store in all reasonable lines, including groceries is attracting new customers steadily. You should call and see for yourself—Always ready to show goods and quote prices.

## Gunder Nerison.

## SETTLERS FOR WEST ARRIVE BY C.N.R. SPECIAL

THE first week of March saw the arrival of the advance guard of the heavy movement of immigrants to Canada anticipated for this spring, when six hundred Britishers and Europeans arrived at Winnipeg en route to their destinations in British Columbia and the prairie provinces. This number, arriving in the evening by special and regular Canadian National train, were immediately re-ticketed and the majority left the same night for their new homes.

A party of fifteen English boys ranging from 15 to 17 years of age, is shown grouped around the engine that brought the immigration special into the Canadian National depot. Good homes on farms for each of these sturdy young lads had already been arranged by Capt.

T. Smith, of the Church Army Distributing Home, Winnipeg, who is shown near the centre of the group.

Below, at the left, is a typical group of rugged Central Europeans, several hundred of whom were included in this contingent of settlers. At the right three little new Canadians were delighted to have their pictures taken on top of the family baggage—C.N.R. Photos.

all the time, and greenfeed is fed once a day.

When the chicks are two weeks old the following ration is used: A prepared chick scratch feed and a chick mash, composed of the following: Bran 100 lb., shorts 100 lb., oat-chop free from hulls 100 lb., corn meal 20

lb., beef scrap 20 lb., bone meal 20 lb., charcoal 5 lb., cod liver oil 1 pint per 100 lb. mash. This mash is kept in the hopper before the chicks all the time, and the scratch feed is fed morning and evening. Butter milk is used as drink at all times. All drinking vessels are kept thoroughly clean,

and brooders are cleaned each week. Greenfeed is fed each day which consists of alfalfa leaves, mangels or sprouted oats. A wet mash is fed at noon each day. When the chicks are 8 weeks old they are put on range after which their ration is gradually changed.

# Movement To Link Up The Various Wheat Pools Into A Close Association

An international wheat pool sounds like an exceedingly ambitious project. Wheat pool members themselves are hard on the heels of the movement in the cooperative principle. Some, no doubt, will suggest that the success of the national pool depends on the assurance by a longer experience before there was any thought of an international pool. The organization which is being formed at the present meeting at St. Paul, however, is not, strictly speaking, an international pool. It is to be a pool of wheat pools, actually put the wheat from the different countries into one pool, but rather to link up the various pools in a close association.

It is hoped to profit from one another's experience in pool management, and it is planned to secure complete and accurate information regarding crop prospects in different countries, available grain supplies and the demand from importing countries. Then the idea is according to pool delegates at St. Paul, to feed the grain on to the market as it is required and in such way as to eliminate speculation and secure for the producers in the various pools the full price which the actual condition of the world market would warrant.

This is all quite intelligible and seems a natural development from the individual pools. The future of the international organization depends, of course, on the fortunes of the wheat pools. Some say that it is to be assured, while others consider that the experience of the past few years has shown that a wheat pool is a huge business proposition whose success depends on many different factors. They say that the prevailing high prices have enabled the pools to pay the farmers a good return, as a result of which they have been well satisfied. But the fact that a wheat pool is a huge business proposition whose success depends on many different factors, they say that the prevailing high prices have enabled the pools to pay the farmers a good return, as a result of which they have been well satisfied. But the fact that a wheat pool is a huge business proposition whose success depends on many different factors, they say that the prevailing high prices have enabled the pools to pay the farmers a good return, as a result of which they have been well satisfied.

The farmers of Western Canada have been encouraged to go into the pool of their wheat by the success in other co-operative enterprises and they are bent on giving it a good trial. It is the farmer's own business and whether it is eventually found to be the best plan for the benefit of the whole country—Mauld and Fox Press.

## Trying To Combat Weed Menace

Experiments in Crop Rotation Will Be Conducted In Manitoba

A definite programme of experiments in crop rotation will be launched in three sections of Manitoba this year as a means of combating the weed menace, according to Hon. A. E. Ross, minister of agriculture. The experiments will be conducted over a three-year period. There will be five plots of an acre each put into rotation in each section.

The first year one plot will be sown in grain and then planted in wheat. The second plot will be sown in grain and then have eye planted in the stubble following the first crop. The third plot will be sown in grain and plowed the same day as the first. Plots 4 and 5 will be sown in grain and treated to the ordinary fall plowing.

During the second year the clover and eye on plots 1 and 2 will be cut and the ground cultivated until May 15. Plot 3 will be treated the same as the previous year, and plots 4 and 5 commercialized.

What will be sown in all the plots in third year and a close check kept on the yield.

**Forbidden to Marry Christians**  
Moslem women are not allowed to marry Christians by the terms of the modified form of the Civil Code law before the Turkish National Assembly for ratification. The law which prohibits polygamy and divorce by the mere whim of the husband, declares, as null marriage contracted with Christians.

**Cannot Enter House of Commons**  
It is interesting to note that the House of Commons is the one room in the empire which the Moslem cannot set his foot. As he is to be no more than a visitor to the Commons, he is never admitted from hearing or seeing them at work.

The death of passengers on British railway trains have averaged three yearly for the past 25 years. Travelling by railway seems to be safer than by land.

W. N. C. 1629

## Saskatchewan Dairy Pool

Organization Plans to Avail itself of Government Subsidies

The Saskatchewan Dairy Pool will incorporate under the title "Saskatchewan Dairy Cooperative Marketing Association." This "association" will be reached at a meeting of the provincial directors held at Regina.

The association will be incorporated under the new act, passed at the last session of the legislature, providing facilities for the incorporation of pools without the necessity of securing a special private act of incorporation.

The directors conferred with Hon. C. M. Hamilton, minister of agriculture, and Hon. J. A. Cross, attorney general, regarding the possibility of organizing a province-wide dairy pool. At the close of the conference they declared they had been very favorably received by the members of the cabinet.

It was also decided to canvass the members of the provincial dairy pools to decide according to that part of the province proper representation on the provincial board of directors.

It is proposed to absorb the organization known as "The Dairy Pool Limited," which was established about two months ago to cover the Regina district.

A province-wide campaign for contracts will probably be under way by the end of the month of April. The directors were in conference with Norman Clark, president of the Alberta Dairy Pool, who has given them advice regarding the difficulties to be expected in the organization of a dairy pool and how they were overcome in Alberta.

## Natural Resources Bulletin

The Economic Value of Wild Life In Canada

The natural resources intelligence service of the department of the interior, Ottawa, says:

In addition to fur-bearing animals, so conspicuously identified with the early history of Canadian commerce, the Dominion is richly endowed with other wild life which, though not commercialized in the same sense or degree, forms a national asset of incalculable value. Canada possesses a wealth of game species as well as of the bird life indispensable to agriculture and horticulture. The numerous hunting grounds of Eastern Canada, the bear and moose range of British Columbia, game animals, birds and fishes, abundant variety, have given to the Dominion exceptional natural advantages in its means of recreation for the hunter and the angler.

The economic value of wild life, and of the magnificent scenery with which about it attract visitors from almost all areas, number have been the subject of much discussion by the Federal and Provincial governments. In no respect has the administration of the public lands been more liberally provided than for the creation and maintenance of a system of national parks, game reserves and game preserves. While these areas, covering many thousands of square miles, indirectly yield a generous return upon the public monies invested, they represent a factor in national well-being which cannot be fully measured or appraised by monetary standards.

## A Lancashire Colony

Moves to Establish Lancashire Families On Land In The West

Lancashire traditions are to be perpetuated in Canada by a new organization, the Lancashire Settlement Association, according to advice received from London. A considerable sum of money has already been received from the Lancashire people, and it will be used to purchase farms and equipment in Canada and to install Lancashire men and their families there. No attempt will be made to establish an exclusive Lancashire colony. The farms purchased will be in the same area, but separated from each other by other farms occupied by old and experienced settlers on whom the newcomers can pattern themselves.

## Council Must Pay Reward

An Old Country bylaw passed in 1847 when horse-stealing was much in vogue, offered a reward of £40 for securing the conviction of a horse thief, and as this measure had never been repealed, it was now being invoked by a Canadian.

At Lucknow, Ont., claimed the reward for capturing and convicting Elmer Daniels, a lad who recently stole a Lincolnshire horse named Sam and was jailed for the offence. The county council had no other option but to pay the toll—Tara Leader.

## Want To Keep Out Infected Plants

Canadian Council Orders Exhaustive Report On Horticultural Imports

An exhaustive report on all aspects of the horticultural industry in relation to the tariff question is to be submitted at a future meeting of the council, was ordered at the closing session of the Canadian Horticultural Council, Ottawa.

Resolutions were passed asking that the Dominion department of agriculture be requested to provide horticultural information to the council on its staff to prevent the importation of infected trees and plants into Canada, also that the customs authorities more rigidly enforce the customs regulations as affecting importation of horticultural products.

A special committee was appointed to present to the government against the free importation of fruits and vegetables.

## Overseas Settlement

Views of People Held Too Low

Presiding British Empire Trade Society of Arts, Viscount Birmham, president of the Imperial Press conference, said that the British people had never taken overseas settlement from a high enough standpoint. It had not been regarded so much as an act of patriotism as an act of necessity.

Viscount Birmham urged that propaganda should tell only the truth. He did not find fault with the Dominion for demanding a high standard of health, but pleaded that conditions should be thoroughly well-known and a standard fixed.

## Canadians Eating Few Apples

Due to Lack of Advertising Says Dominion Fruit Commissioner

Canadians are eating fewer apples than they used to, consumption having fallen to less than half an apple a day, Mr. G. E. McIntosh, Dominion fruit commissioner, says. At the same time, consumption of citrus fruits has increased. Mr. McIntosh says this is due to the advertising that oranges and lemons have been getting.

The moral should be obvious. Canada cannot raise citrus fruits. If we want our producers to benefit by the money we spend for fruit, we should advertise the apple—Herald City Star.

## Salmon Travel Quickly

One Recently Covered Nearly 1,200 Miles in Less Than Month

That salmon travel amazing distances in short periods is indicated by the journey of one fish which was liberated at the southern end of Vancouver Island last June and was caught less than a month later in the Molokai River, Quebec. Identification was made by means of the silver tag which had been placed in one of the salmon's fins when it was first captured. Its journey was between 800 to 1,200 miles long. By means of the tag, valuable knowledge is being gained as to the habits of salmon and other fish—Popular Mechanics.

## Mexico City's Suburbans

As the ground on which the City of Mexico stands was once the bed of a lake, it is not considered safe to build skyscrapers in that city. The highest building there is seven stories.

## Mining and Agriculture

Exploitation of Minerals Opens Up Country For Farming

"It is estimated we have used more of the earth's mineral resources in the last 75 years than in all preceding time," said Charles Cannell, deputy minister of mines, in his paper on the "Influence of Minerals on Canadian History and Development" before the twenty-eighth annual general meeting of the Canadian Institute of Mining and Metallurgy at Montreal. "Time and again throughout the last 75 years, Canadian development had received extraordinary impetus from mineral discoveries," Mr. Cannell declared.

Previous to the discovery of placer gold in British Columbia in 1858, that province was a wilderness occupied only by a few roving tribes of Indians. The Cariboo rush of 1860 brought the first flood of people to that country and effected a radical change in its history.

History was now repeating itself in Northern Manitoba, Ontario and Quebec on perhaps a less spectacular but probably a more effective scale.

Mr. Cannell said the colonizing and mining influence of metal deposits has been a factor in the development of the country's mineral products was making it possible to exploit the districts for the development of agriculture.

## Farm Accounting Made Simple

Every Farmer Should Keep a Correct Record of His Affairs

Maintaining some form of accounting is absolutely essential for the farmer to be sure that he is farming in the most profitable way. It is the only way to ascertain what returns his land will yield in order to make a profit over production cost, and it is a guide to the farmer in deciding which particular lines of work are profitable and which are not. With the object of supplying a simple and efficient form of farm accounting which will take up little time yet will enable one to keep a correct record of his affairs, the department of agriculture at Ottawa has published a small account book designed to cover a year's work. It gives directions for the making of entries and the taking of inventories, and also contains a system of book-keeping. It may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

## Greater Butter Output

Saskatchewan Shows Increase in Production For Month of January

Creamery butter production in the province of Saskatchewan in January last amounted to 629,229 lbs., as compared with 602,229 lbs. in the corresponding month a year ago, according to a statement issued by the provincial dairy commissioner. While the increase is comparatively small, yet it is gratifying in view of the fact that the output for January, 1925, was unusual for high milk prices in excess for a British Columbia has won her first prize in the production of the same year.

## Wins First Case

Miss C. E. Young, who has the distinction of being the first woman to sue a British court, has won her first case. The trial lasted two days. The jury awarded the plaintiff, a woman, £74 damages.

# No Efficient Alternative Yet Devised for the Influence Of the Home Life on Children

## Farms in Hudson Bay Area

Demonstration Farms Operated Along the Hudson Bay Road

Further details of the experiments in growing agricultural products along the Hudson Bay Railway line, just to be used, indicate that the policy is much broader than the recent announcement indicated.

The three demonstration farms are located at Hudson Bay Junction, Mile 127, and Mile 135. In addition to these, the department has arranged to have a full line of agricultural products grown at Mile 42, Mile 81 and at Port Nelson.

The products to be grown are wheat, oats, barley, peas, clover, grasses, lucerne, corn, flax, mangel warts, lettuce, radishes, beans and cabbages.

Adequate records of the progress of everything planted will be kept and in the course of a few years a large body of facts on production in the northern part of Manitoba will have been accumulated.

## Manitoba Dairy Industry

Production of Creamery Butter Shows a Substantial Increase

Substantial progress was made by the dairy industry of Manitoba during the month of January by the amount of the provincial dairy branch. The production of creamery butter was 15,662,212 lbs., an increase of 1,036,229 lbs. over the corresponding month of the previous year. Experts of the conservative estimate places the butter fat shipments to the United States from the province at 1,060,000 lbs. for the twelve months. The total mass of cream last year amounted to 765,071 lbs., an increase of 264,774 lbs. over the previous year. Exports of creamery butter last year, mostly to Great Britain, amounted to 315 carloads, or 152,000 fifty-six pound boxes, valued at \$1,650,000.

## For Spring Work

Increased Amount of Land Ready For Cultivation in Manitoba and Alberta

According to the estimate of the general agricultural agent of the Canadian Pacific Railway, land prepared for spring work in Western Canada shows an increase of 756,700 acres for the twelve months. The total mass of cream last year amounted to 765,071 lbs., an increase of 264,774 lbs. over the previous year. Exports of creamery butter last year, mostly to Great Britain, amounted to 315 carloads, or 152,000 fifty-six pound boxes, valued at \$1,650,000.

## Satisfied With Definition

Of the word "definition" as given by the Scots and took every occasion to manifest that dislike. Even in his dictionary he defined " Scots" as "the people of Scotland."

He asked a Scotch friend how he liked it. "Couldn't be better," said the friend, "and you might have added that there's no food in it, for where will you find such horses as in England and such men as in Scotland?"

## Endows Monument To Eve

Robert, author and barrister, who recently returned from an admirable attention by erecting in the front lawn of his home a monument to Eve, the first woman to be put to death in the history of the world.

Under the terms of the monument, flowers would be placed regularly against the monument, the lawn would be well kept and an annual ball with some charming musical entertainment, the most marvellous exhibit.

## Bible Contains Milton's Signature

Containing the signature, "John Milton, Feb. 21, 1651," a Geneva Bible, 1535, has just been sold "entirely without reserve" for the sum of £100,000. The Bible was purchased by the National Library of the University of Toronto. The Bible was purchased by the National Library of the University of Toronto.

## All Winter Sports at Banff

The big thrills and the keen air made the Banff winter sports forestier for the sports book back on their formation at a night of delight. People came from Calgary and all over Alberta and from the other side of the Rockies, Vancouver and Victoria, while visitors in the above photograph were considerably in evidence. A great army of skiers assembled with the enjoyment of the alps and ski-touring, while hockey and fancy skating made its appeal to the big thrills and the keen air made the Banff winter sports forestier for the sports book back on their formation at a night of delight.

Modern civilization has, as yet, devised no efficient alternative for the influence of the home on children and that influence has been steadily on the decline. As the Bishop of Ely has said, collectively, the home life is at once the cause and the outcome of the degeneracy of national character, and character, "indistinctly more than the strength of its armaments, or the prosperity of its commerce, or the abundance of its wealth, is the security of a nation." The Roman Empire had its root in the once strong simplicity of the homes of its citizens. It fell, as the decadent power of Javan, all tell away, the strength of that home-life.

The motor car, the film, and even the most efficient channels for instruction in the social evil have been introduced in a decay of home-life. There are undoubtedly agencies at work which are collectively, the home life is at once the cause and the outcome of the degeneracy of national character, and character, "indistinctly more than the strength of its armaments, or the prosperity of its commerce, or the abundance of its wealth, is the security of a nation." The Roman Empire had its root in the once strong simplicity of the homes of its citizens. It fell, as the decadent power of Javan, all tell away, the strength of that home-life.

It is here that the parents themselves are largely to blame, for with the increase in the number of children, the parents are less able to give them the same care and attention as in the past. The parents are less able to give them the same care and attention as in the past. The parents are less able to give them the same care and attention as in the past.

## WORLD HAPPENINGS BRIEFLY TOLD

The Spanish Government plans to establish at Cape July an air port open to fliers of all nations.

The Academy of Moral and Political Sciences has elected King Albert of Belgium as foreign associate member. Princess Marie Jose, daughter of King Albert of Belgium, won a place in a contest conducted by the Belgian Musical Union.

The Japanese Emperor has given permission for the filming of records of the Imperial Palace and also the ancestral shrines.

The Washington Post says King Alfonso and Queen Victoria of Spain are to make an extended visit to the United States, probably this autumn.

Dr. Beaumont S. Cornell, of Brockville, Ont., has been chosen to conduct a research on pernicious anemia, provided for by the late J. B. Hays, American tobacco magnate.

Prince Alexander Romanovitch, second son of the late Czar of Russia, has arrived at New York to establish a new Petrograd on Long Island for Russian emigrants.

A League of Nations commission of inquiry is leaving for Persia on study days and means of substituting other crops for the poppy in an effort to curb opium production.

Magistrates and prosecutors in St. Louis have been punishing violators of traffic laws for learning to drive automobiles themselves in order to discover how easily traffic rules can be violated.

It was announced that Hon. J. E. Caron, minister of agriculture in the Quebec Government, is leaving on April 15 for France. There he will represent the province at the international congress of agriculture, which is to be held in Paris.

## Pain in the Back

## Yields to Nevrilene

If you have failed to secure relief from other remedies, rub on lots of good old "Nevrilene," the strongest, most penetrating pain relief on the market. Nevrilene acts quickly on small pains and is strong enough to dive on the big ones. It's because every drop of Nevrilene goes in, because it has the ability to sink in deeply that it drives away pain as fast as ordinary liniments work at the surface. Large 50c bottles at all dealers.

## John Dixon Dies in Ottawa

John Dixon, former newspaperman, director of publicity of the common sense of conservation during war years, and director of publicity of the intelligence services of the natural resources branch, died at Ottawa, aged 57. Born in St. Thomas, Ont., he was at one time manager of the Edmonton Bulletin. A sister, Mrs. W. H. Haden, of Cranbrook, B.C., is among his survivors.

## It Will Prevent Ulcerated Throat

At the first symptoms of sore throat, which progresses to ulceration and inflammation takes a teaspoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will stop the irritation and prevent the ulceration and swelling that are so painful. Those who were periodical subject to quinsy and tonsillitis made themselves immune by using it.

## Will Speak For Himself

The Prince of Wales is reported to have said to an old maid friend: "When there's an interesting announcement to be made about me I'll make that announcement myself."

The man who tried to drown his troubles always seems to have an idea that they are located in his stomach.

## WET FEET

Fake no chances with colds. Rub your feet with Minard's.

W. N. O. 1629

## Choose Quebec City For Press Convention

C.W.N.A. Will Meet This Year June 16, 17 and 18

At the midwinter directors' meeting of the Canadian Weekly Newspapers' Association held at Winnipeg, it was decided to hold this year's convention at Quebec City, June 16, 17 and 18 respectively.

A committee was appointed to arrange the details. L. J. Hall, Toronto, presented the managers' report for last year. It was discussed and adopted. Invitations to hold the 1927 convention were received from London, Ont., and Banff, Alta. The decision as to where the convention be held was left in abeyance. The meeting was presided over by J. A. McLaren, The Barrie Examiner, Ontario.

## Enjoy The Pleasure Of Perfect Health

## Dodd's Kidney Pills Purify the Blood, and Pure Blood Means Good Health

Mr. J. Leveille was Relieved of Kidney Trouble by Dodd's Kidney Pills. A. J. Leveille, P.O. (Special),—For three years I suffered with kidney trouble. I still tell my relations who did the no good. Having read the advertisement, I tried four boxes of your excellent pills and felt better immediately. I still tell my relations who suffer from kidney trouble that Dodd's Kidney Pills are the only perfect confidence."

This statement comes from Mr. J. Leveille, a well known resident of this place. You who suffer from your kidneys you will find some of your neighbors who have been cured by Dodd's Kidney Pills. Relief from some form of kidney trouble. It may have been the dry, itching skin, dizziness, nervousness and inability to get refreshing sleep that has been your trouble. The disease, or it may be diabetes, dropsy, rheumatism or some other of the dangerous diseases that mark its advanced stages.

## Helps Children Grow SCOTT'S EMULSION

RICH IN COD-LIVER OIL AND HEALTH-GIVING VITAMINS

## May Reduce Aviation Cost

British Experimenting With Crude Oil Engine For Aeroplane

Research work, which may lead to a sweeping reduction in the running costs of aircraft, and to permit commercial aviation to pay without government subsidies, is in progress at the Royal Aircraft Establishment, Farnborough, and is nearing a decisive stage.

The crude oil engine, which has been undergoing development for a long time, is about to be tested in the air. It has been installed in a large biplane which normally mounts a 1,000 horsepower engine.

Eight hundred horsepower is developed by this crude oil engine. Its crankcase is made of a special alloy, and many unconventional features are incorporated in the design.

The effect which the production of a satisfactory engine of this type would have on civil aviation can be seen if a comparison of running costs is made between an ordinary three-engine freight-carrying machine and a similar machine fitted with such engines. The conventional machine would cost about 14 cents per ton-mile, whereas the other would cost only three cents per ton-mile. A motor lawyer, it may be added, costs about one cent per ton-mile.

## Vancouver Grain Shipments

More Grain Being Shipped Through Pacific Port Than Ever Before

More grain is being shipped through Vancouver this crop year than ever before, according to figures prepared by the Vancouver Merchants' Exchange. The total for the crop year 1925-1926, to the end of January, was 25,841,496 bushels actually shipped to sea. For the same period in the previous crop year, 1924-1925, there was a movement of 15,946,787 bushels, and the big year of 1923-1924 had a total export of 21,352,320 bushels at the end of January, 1924.

## TOO LITTLE BLOOD

The Cause Of Nearly All The Everyday Ailments of Life

Too little blood—that is what makes men and women look pale and sallow and feel languid. That lack makes them drag along, always tired, never rest happy, unable to digest their food, breathe after even slight exertion, and often feeling that life is scarcely worth living. Can't you imagine tell them they are anemic—the plain English being too little blood.

Many of our weak men and women have been made strong, energetic and cheerful by taking Dr. Williams' Pink Pills. It is an excellent proof of the statement. Mrs. Foster says:—"Some years ago I was very much run down. My doctor attended me for several months but then told me to go home and rest. I was so weak that I could not go to work. When the doctor told me to go home and rest, I was so weak that I could not go to work. When the doctor told me to go home and rest, I was so weak that I could not go to work."

Delightful Version of the Two-Piece Sports Frock. First, the material, best green and navy checked, in the smartest thing for those essential costumes. Then there is the deep yoke front and back from which extend two boxpleats. The long sleeves are of contrasting color silk, this harmonizing tone being carried by the collar and all around the neck. It is obvious the skirt, which is joined to a cummerbund, sets its fashion by repeating the boxpleat of the overblouse.

## ON THE AIR

What is Doing in the World of Radio

Radio is becoming popular among the Russian masses. About 1,000,000 wireless sets have been sold in Russia.

One of the tallest towers in the world, built exclusively for commercial radio purposes, has been completed for the German ministry of posts and telegraphs at Koenigsberg, near Berlin.

The Swedish Air Traffic Society is planning an air fleet of "taxicabs." Those flying vehicles will be equipped with radio so that the passengers can enjoy concerts as they sail through the air.

The source of static and its favorable playground cannot be located, according to Dr. Lester Brookshier, Northern University physicist, who has just completed tabulation of reports from a nationwide radio test.

Another dream has come true in the radio world with the perfecting of the batteryless set, over which concern may now be relieved with a volume and clearness of tone equal to that of the best set of the battery-supplied receivers.

Station KOA, Denver, will provide national newspaper editors with a similar machine fitted with such engines. The conventional machine would cost about 14 cents per ton-mile, whereas the other would cost only three cents per ton-mile. A motor lawyer, it may be added, costs about one cent per ton-mile.

The establishment within the next three months of a plant in Winnipeg for the manufacture of radio vacuum tubes, is announced by N. L. Noth, manufacturer, of Minneapolis, Minn. Creation of this new industry in the Manitoba capital, Mr. Noth declared, would result in an appreciable reduction in the price of tubes sold.

A phenomenon puzzling electrical experts at the head of the lake is a "radio pole" on Simpson Street in Port William from which it is claimed the strains of music and the announcement that the music was coming from a broadcasting station in Pittsburgh may be heard. Persons claim that while standing at the foot of the pole, they have heard the music and announcement clearly on different occasions. The pole is situated in the business section of the city, carries a network of wires to and from a transformer.

Rob it in for Lane Back—A brisk rubbing with Dr. Thomas' Electric Oil will immediately absorb the oil and it will penetrate the tissues and bring ready relief. Try it and be convinced. As the liniment sinks in, the pain ceases. That the scripture (Ps. 22:18) "see how they have laid their hands on me" is an excellent remedy.

## Prince Has Anyrhine Title

Earl of Carrick Was Handed Down From Robert Bruce

When the Prince of Wales visits Anyrhine in March he will be making acquaintance with a county from the southern division of which he takes one of his titles, that of the Earl of Carrick. It comes down to the Prince of Wales from his grandfather, King George V, who took the title from his mother, Queen Mary. The title of Carrick was born not at Lochmaben, but at Turnberry Castle. Bruce inherited the title from his mother, through whom the royal family is connected with the ancient Celtic lords or kings of Galloway. An colonel-in-chief of the Royal Scots Fusiliers, and as Earl of Carrick, His Royal Highness will have a double interest in his short sojourn in the Barony county.

## Plan Fast Air Service

A ten to twelve hour air service between Hamburg and New York is the aim of a newly-formed scientific research society for aviation in higher altitudes, known as the "Hochgeschwindigkeitsgesellschaft," established in Berlin.

## She Couldn't Sleep

Mrs. W. S. D. McIntosh, Charlotte, N.C., writes: "About a year ago I was greatly troubled with my nerves. I could not sleep at night, and was so nervous I imagined that I could see everything in the room moving, and would have to turn on the light before I could get to sleep."

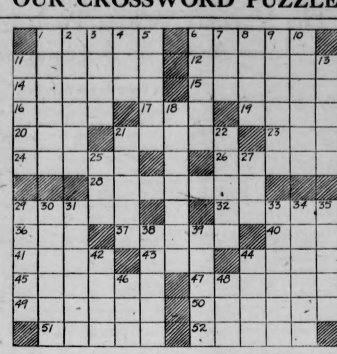

After having read of your

"MILBURN'S HEART NERVE PILLS,"

I took several boxes of them, and can now get a full night's sleep with no more trouble and feel like a new woman."

H. & N. Pills have been on the market for the past 22 years. All dealers sell them; put up only by The T. Milburn Co., Limited, Toronto, Ont.

## OUR CROSSWORD PUZZLE

Horizontal  
1—Name of a place.  
4—Piece of furniture.  
10—Adverb.  
12—Day of the week.  
14—Modern.  
16—Aid found in fruits.  
18—Man's name (poss.).  
20—Who paces.  
22—Book of maps.  
24—An epoch.

## MAY PROSECUTE WITNESSES IN CUSTOMS PROBE

Montreal.—R. Calder, K.C., counsel for the parliamentary committee investigating the fraud charges in connection with the department of customs and excise, is preparing to initiate proceedings against witnesses who might incur the charge of perjury.

"The issue of dealing with perjury," he said, "has been very properly raised by R. G. Rogers, president of the Commercial Protective Association. As far as I am concerned I am prepared to recommend and initiate proceedings."

"The public must not get impatient," he stated, when commenting on proceedings. "All good inquiries must start and develop slowly. Dead-end investigations usually start with a bang and end with a snarl. During the past two weeks," he continued, "the members of the committee have been securing the production of documents on which the work will largely be based. Several hundred files are now under examination and all those relevant to the scope of the inquiry will be put before the committee by the best primary evidence available."

"Some criticism has been made of what is called 'legal quibbling.' This criticism is chiefly levelled at the handling of hearsay evidence. It must be evident to any person that the rules of proof must be followed if justice is to be attained.

"It is my intention to clean up inquiries raised by the Duncan report about which there has been much curiosity, and then to bring before the committee certain classifications of customs infractions and liability."

## Vagrant Children Of Russia Form Unions

Berlin Ganga Give Themselves Union Names and Status

Montreal.—Following literally the Communist slogan, "workers of the world unite," groups of Russian children in Russia have formed themselves in local "trade unions" and "ganga."

In the Shadrinsk district of the Urals, the street gamblers have organized a pickpocket first, the "Tepidly" or "It is so cold."

In Ekaterburg groups of homeless boys who have specialized in petty larceny have joined into the "Young Handful Union." Among the "gangs" established by parentless children in Moscow is the "Anatolevskaya" (fatherless of Young Pigeon 77145).

## Liner Will Be Scrapped

Empress of Japan Sold to Iron Merchant

Victoria.—The old Canadian Pacific Empress of Japan, once the fastest ship on the Orient run, has been sold to T. K. Kanagawa, a Kobe for 17,000 yen (approximately \$25,000), and will be taken to Japan to be scrapped, according to advices received here from Japan. Kanagawa, who had been lying idle at Vancouver for several years past, will be delivered in April or 1929. Kanagawa, purchaser of the ship, is a Kobe iron merchant.

## Sign Migration Agreement

Britannia, Australia.—The government of Queensland has signed the migration agreement with the British Government is a party and under which the maximum amount of £250,000 (\$125,000,000) is to be allocated to the Australian states for the settlement of immigrants. New South Wales is now the only state which has not signed the agreement.

## Japan Protest Against Blockade

Peking.—Taking exception to the violation of the 1901 protocol requiring that communication between Peking and the sea be kept open, the "protector" powers filed a protest with the Chinese foreign office against the blockade of Tientsin and demanded that they bring about its immediate cessation by both hostile factions.

## Miners Accept Agreement

Sydney.—The miners of district 26, United Mine Workers of America, have accepted by a majority of 201, the proposed agreement with the British Empire Steel Corporation. The total number of votes polled in the referendum was 4,891.

## Noted Surgeon Dies

Victoria, Australia.—Prof. Friedrich Plummer, noted for his researches in optical surgery, died recently, aged 71. He willed his body to the Anatomical School.

W. N. U. 1620

## For Return Of Alberta Natural Resources

Measure Is Given Second Reading In The Legislature

Edmonton.—Good progress is being made with the Alberta Government's legislative programme. Order "Party bills have been introduced into the house, and a number have received second reading, and have been passed through the committee. Many of the bills are of a non-contentious nature, being consolidations and amendments of existing statutes.

The bill providing for the transfer to the province of its public lands and minerals was given second reading. Opinion on all sides of the house is unanimous in favouring this measure.

At present the Dominion Government owns the natural resources of the province. Premier Brownlee said that a bill embodying the agreement with the province would be introduced in the coming session, and he did not anticipate any serious objection. The bill was a government measure and he had in addition received assurances of support from Opposition members. Before being given the consent of the house it would require the consent of the Imperial Parliament, but unless other provinces objected, there would be no difficulty there.

The Alberta legislature are also unanimous in favour of the Dominion give the public utilities board of the province control over charters and rates of shippers. At present companies are being retained charters by the province and granted them by the Dominion.

Some measure of protection for the public is demanded by the oil boom which recently commenced in Alberta. The province is interested in railway rates north of Edmonton to the extent of \$25,000,000. None of these railways are paying their way.

The Edmonton, Dunsmuir and British Columbia Railway Company was the subject of an all day debate in the house. The Liberals demanded to know what progress was being made in the negotiations for the disposal of these railways, but the government were reluctant to disclose at this time the progress of the negotiations. However, they promised a statement before the close of the session.

The point pressed by the Opposition was that the people of the north country were suffering from the uncertainty caused by the oil boom. The government speakers said that no possible agreement could give the people bordering on the line any better rate conditions than at present. Further, more the people of the province as a whole were interested in their utility rates, as well as the people of the north.

## Wheat Pool Payment

Interim Payment of About \$37,000,000

Regina.—The following announcement was issued by A. J. McNeil, president of the Canadian Co-operative Wheat Producers' Limited: "The wheat pools in the three provinces, Manitoba, Saskatchewan and Alberta, have agreed to interim payment of 20 cents per bushel on all grades of wheat. On coarse grains a payment of six cents per bushel is made on oats and barley. On rye, a 25 cents on distribution.

"As a result of this distribution, the total payment on the different grain on and after March 11, will be as follows:

"Wheat, \$120, bush 1; Fort William, 40 cents; bush 2 C.W. Fort William; barley, 56 cents, bush 3 C.W. Fort William; rye, \$175, bush 1 N.W. Fort William; 39 cents, bush 2 C.W. Fort William.

"Approximately 150,000 cheques will be mailed from the three provinces, after the amounting to a total of about \$37,000,000."

Urges Acceptance Of Design Winnipeg.—Taking the stand that the status of naturalized Canadian citizens is jeopardized by the present opposition to the passport bill, a special design submitted by Edward Hahn, Toronto sculptor, the Canadian Club of Winnipeg urged the unqualified acceptance of the design. Hahn, who was born in Germany, has been a resident of Canada for 28 years and was naturalized on becoming a age.

Druse Tribesmen Lose Heavily Beirut, Syria.—The Druse tribesmen who are fighting against the French have suffered serious losses in a heated engagement in the environs of Beirut. The French claim to have lost only one officer and two men killed.

## Revealed By Blunder

Victoria.—Through a blunder in the detail, details of a big Japanese naval construction programme were laid bare recently according to advices from Tokyo by the liner Empress of Australia which arrived here.

## Trouble With Turkey

British Ambassador Leaves Post As Result of Action Taken Against British Interests

Constantinople.—An Anglo-Turkish relations took an unsatisfactory turn when Sir Ronald Lindsay, the British ambassador, suddenly departed for London. This created an air of pessimism in foreign circles.

Ambassador Lindsay returned from Greece, whence he had gone to protest against the recent action of Turkey in closing the English high school and threatening a similar move against the British bank. It is understood that Sir Ronald told Rashid Bey, the foreign minister, that Turkey had violated the Lusitania Treaty and that he was unable to resume the Mosul negotiations unless the authorities discontinued action which was considered illegal to British interests.

The fact that the ambassador assumed an attitude of silence is interpreted as indicating that he considered Turkey had broken the treaty, which could not be discussed without consultation with the British foreign office.

Port William.—Following is the report of R. A. Virell, stationmaster in the board of grain commissioners on the movement of Western Canadian grain during February.

"Conditions respecting the marketing and movement of Canadian grain during the month of February remained almost exactly similar to those obtaining during January. The demand from European importers is quite slight, native supplies in Europe being utilized to the fullest extent possible while good quantities of Argentine and Australian wheats are arriving, which will furnish the bulk of the immediate import requirements. Beyond certain quantities of high grade wheat, necessary to millers producing strong flour, there does not appear to be any prospect of a change in the situation, for the present at least.

The movement of Canadian wheat into consumption by foreign channels continues very moderate in consequence. From the head-of-the-line, the movement to the United States is extremely light. The unloading of winter storage cargoes apud at Canadian lower lake ports for movement to the seaboard for export has also been slow, almost 2½ million bushels still remaining to be shipped, while at Buffalo and other United States ports the total represents another 2½ million bushels. At Vancouver a steady shipment continues, averaging 1½ million bushels weekly and shipped each week.

"Ocean freight rates from Vancouver continue around 39 shillings per ton to United Kingdom and Continent, and \$17.50 to \$20 to the Orient. The small movement from Atlantic ports, however, has not been sufficient to meet the needs for liners to obtain 'bottom' cargoes, and rates have fallen markedly.

## New Chemical Element

Urbana, Ill.—Honoring the state and the University of Illinois, the newly-discovered chemical element number 61 is to be called Illinium.

Mr. and Mrs. Percy Mobey and their family of six husky children were the first arrivals this season from Great Britain under the "3,000 Pound Scheme" of the British Empire Settlement Board. The family, set in a screened bus, accompanied them to their new home on Vancouver Island by the Canadian National Railway. The Mobey's, who arrived in Canada about the middle of February, have taken up the Imperial terms of the Canadian Land Settlement Board near Victoria. Mr. Mobey was a farm laborer at Exton, Northamptonshire. His children range from two to 15 years of age. The buildings on their new farm are ready for occupation and everything is in readiness for the spring work.

Discuss Change Of League Headquarters Opinion Expressed That Geneva Is Not Entirely Suitable

Geneva.—Lord Cullen presided at a meeting of delegates from the dominions to the league assembly at which the situation here was discussed. A great part of the meeting was given over to the question of building a new assembly hall for the league session. This raised the whole question of Geneva's suitability as league headquarters. Several delegates spoke of the necessity of investigating with regard to the cost of living and Geneva's economic and geographic position. Several delegates spoke of the necessity of investigating with regard to the cost of living and Geneva's economic and geographic position.

Sugar Shortage In Turkey Constantinople.—Turkey is suffering from a sugar shortage, which has been the scarcely experienced in most countries. The Turkish sugar beet growers are doing a thriving business owing to the government's failure to organize the necessary machinery for operating its recently announced monopoly of the sugar business.

C. N. R. Brings Season's First British Family

Mr. and Mrs. Percy Mobey and their family of six husky children were the first arrivals this season from Great Britain under the "3,000 Pound Scheme" of the British Empire Settlement Board. The family, set in a screened bus, accompanied them to their new home on Vancouver Island by the Canadian National Railway. ## SUBMIT OFFER TO PURCHASE BIG ELEVATOR PLANT

Regina.—An agreement covering the offer to purchase the elevator system of the Saskatchewan Corporation Elevator Company, as approved by the port delegates at an extraordinary general meeting held February 17 to 19, has now been forwarded to that company.

The complete system included in the offer to purchase comprises 451 country elevators, together with annexes, agents' houses, etc., two terminal elevators at Port Arthur, namely; Terminal No. 1 with a storage capacity of 1,200,000 bushels, and Terminal No. 2 with a total capacity of 650,000 bushels, the Transfer Elevator at Inland, New York, the company's leasehold interest in the C.N.R. Terminal at Port Arthur, which has a storage capacity of approximately 7,500,000 bushels; and company's office building in the city of Regina, together with furniture, fixtures, etc.

The value of the entire system is to be determined by a board of arbitration composed of three arbitrators. The pool shall select one, the Elevator Company another, and these two shall select a third. The agreement provides that the first two arbitrators are to be appointed within ten days and the third within twenty days after the Elevator Company has notified the pool of its acceptance of the offer.

The sum of \$200,000 in cash will be deposited by the pool prior to the holding of the special general meeting of the Elevator Company, and \$150,000 will be paid by the pool on April 1, 1928, making a total payment to the company of \$350,000. The balance of the purchase price will be paid in equal annual consecutive installments of \$100,000, which will be paid with interest at the rate of 6 per cent. per annum, are payable on April 1 of each year.

The pool reserves the right to pay the whole or any part of the purchase price at any payment date, but may maturely without notice or bonus.

Justice Morrison Of Supreme Court Hands Down Ruling

Vancouver.—The full oil tax of one-half cent a gallon passed by the British Columbia Legislature in 1923 and estimated to return an annual revenue of \$450,000, was declared illegal by Mr. Justice A. Morrison in the Supreme Court on the ground that the tax in indirect and ultra vires of the province.

Although the gasoline tax of three cents a gallon, also passed in 1923, was not involved in the full oil tax case, the statute is analogous, and the reasoning directed against the full oil tax is equally applicable against the gasoline tax. It is generally conceded that if the full oil tax is invalid, that of the gasoline tax is also.

FIX RATE FOR MOVING ALBERTA COAL TO EAST

Ottawa.—Agreement on a tentative rate of \$9 a ton for hauling coal from Alberta to Eastern Canada was reached at a conference today between Hon. Charles Stewart, minister of the Interior, Sir Henry Thornton, president of the Canadian National Railway, E. J. Garland, H. M. Kennedy and L. H. Jeffery, representing federal members from Alberta and four coal operators. The nine-dollar rate is subject to approval by the provincial governments involved.

After the conference, Mr. Garland stated that the agreement provided for the haulage of 200,000 tons of Alberta coal, or whatever quantity can be moved between now and the time that the railway commission issues its findings on the coal rate. The hearing on this matter takes place before a commission in April. Mr. Garland said that under the agreement reached today the \$9 rate is not final. The actual amount to be paid is the out-of-pocket cost rate from the mine to the destination. The proposed rate is to be referred to the provinces for their approval of the increase over the \$7 rate. In the meantime and until their approval is gained, the Dominion Government will guarantee the \$2 difference.

Toronto.—Holding that the acceptance on the part of Ontario of the \$9 freight rate on Alberta coal proposed by the Alberta and Dominion Governments might be construed as an admission by this province that such a rate was reasonable and adequate. Ferguson, in statement, said that such a rate would not be acceptable to the province and that such an agreement could not be entered into.

Portugal Offered British Warships Lisbon, Portugal.—The Lusitania, a large Great Britain has offered Portugal four warships for £50,000, allowing her facilities for payment. The offer was made in exchange for the Lusitania, but the British desire to substitute more modern vessels for it.

Town Razed By Hurricane Vienna.—Dispatches to the Associated Press from Vienna state that in Bosnia was razed by a hurricane and that the entire population is homeless. No mention is made of casualties.

Sweden Claims Life Of League Is Endangered Geneva.—Prompts by Sweden that the great powers, particularly Great Britain, were trying to bully her into agreeing to a coalition of the League of Nations, formed a sensational climax to the unsuccessful negotiations to settle the League of Nations internal crisis.

From Swedish circles came the charge that Sir Austen Chamberlain had secured M. Unden, the Swedish Foreign Minister, of endangering the very life of the league by his intransigent attitude against enlargement of the council beyond the admission of Germany and that the British foreign secretary had declared it was impossible to conduct negotiations with a foreign minister came to Geneva with hard and fast instructions.

M. Unden, alluding to the strong position maintained by Britain and Israel for permanent place, pointed out that other countries seemed to have no objection to Sweden's position, but by voting only for Germany at the present moment, he was serving the highest interests of the league.

The Swedes assert that the allied powers, notably France, made a powerful bid, but not only the admission of Germany and Spain, but also Poland, although they did not insist upon Poland being secured a permanent seat.

## Teach Canadian History

Young Canadians Should Be Steeped In Things Canadian

Vancouver.—"To promote Canadian sentiment we should begin in the schools. Every young Canadian should be steeped in things Canadian and should be taught Canadian history as to other things is taught. That is not being done," B. C. Nicholas, editor of the Victoria Times, declared in addressing the board of trade here. "Only on the broad ground of a persuasive Canadianism can this country be united," he declared. "Promotion of Canadian consciousness rests on two bases, the first sentiment or moral and the second, material or economic."

As a definite formula for creating unity in Canada, Mr. Nicholas advocated increased immigration, the cultivation of foreign trade and the waging of a vigorous campaign of publicity in Eastern Canada to convince people that British Columbia and the port of Vancouver are great national assets.

Coal Probe Was Costly Inquiry Into Nova Scotia Mining Industry Cost About \$30,000

Halifax, N.S.—It was divulged in House of Assembly during consideration of the estimates that Sir Andrew Rae Duncan, chairman of the Royal Commission, who recently conducted an inquiry into the coal mining industry in Nova Scotia, received \$10,000 per month as remuneration for his services, and two other members of the commission, Major Hume Cronin, of London, Ont., and Rev. Dr. H. H. Hume, rector of St. Francis Xavier University, Antigonish, \$750 per month each. The members of the agricultural commission which received \$10,000 per month, and the members of the industry in the province have their services free, but received travelling expenses of \$500,000, and the cost of the agricultural commission was \$2,000 and the coal commission approximately \$30,000.

Fuel Oil Tax In B.C. Illegal Justice Morrison Of Supreme Court Hands Down Ruling

Vancouver.—The full oil tax of one-half cent a gallon passed by the British Columbia Legislature in 1923 and estimated to return an annual revenue of \$450,000, was declared illegal by Mr. Justice A. Morrison in the Supreme Court on the ground that the tax in indirect and ultra vires of the province.

Although the gasoline tax of three cents a gallon, also passed in 1923, was not involved in the full oil tax case, the statute is analogous, and the reasoning directed against the full oil tax is equally applicable against the gasoline tax. It is generally conceded that if the full oil tax is invalid, that of the gasoline tax is also.

Planning Change In Manitoba Liquor Act Legislation Has Been Introduced To Tighten Up Enforcement

Winnipeg.—"Tightening of the enforcement of the Manitoba Prohibition Act is provided for in legislation introduced in the Manitoba Legislature by Hon. B. W. Croft, attorney general, and the legislation will limit the definition of a residence in which liquor can be taken and kept, would provide for the prosecution of persons accused of violation of the liquor laws, and would provide for a government appropriation of \$100,000 for the enforcement of the law, \$50,000 as approved by the legislature last session.

Advocate Stricter Censorship Montreal Organizations Want Cheap Literature Banned From Canada

Montreal.—Two local organizations, the Canadian Book Concern and the Montreal Public Association, took action with respect to foreign periodicals entering Canada. Indignation over what was termed the "avalanche of cheap, sordid and pornographic literature" that comes into this country has led to a resolution being voted by the Chambre de Commerce and the suggestion was made that a stricter censorship should be enforced.

Treed by Wolves Ottawa.—Surrounded by a pack of wolves, the six-year-old Joseph Kingsbury, 25, of Quyon, Que., and Adolphe Laviolette, 45, of Ottawa, were rescued by three hours of snow weather on April 2. In the woods, 25 miles north of Campbell's Bay, Ont., on the upper reaches of the Ottawa River, according to word received here.

Portugal Offered British Warships Lisbon, Portugal.—The Lusitania, a large Great Britain has offered Portugal four warships for £50,000, allowing her facilities for payment. The offer was made in exchange for the Lusitania, but the British desire to substitute more modern vessels for it.

Town Razed By Hurricane Vienna.—Dispatches to the Associated Press from Vienna state that in Bosnia was razed by a hurricane and that the entire population is homeless. No mention is made of casualties.

Sweden Claims Life Of League Is Endangered Geneva.—Prompts by Sweden that the great powers, particularly Great Britain, were trying to bully her into agreeing to a coalition of the League of Nations, formed a sensational climax to the unsuccessful negotiations to settle the League of Nations internal crisis.

From Swedish circles came the charge that Sir Austen Chamberlain had secured M. Unden, the Swedish Foreign Minister, of endangering the very life of the league by his intransigent attitude against enlargement of the council beyond the admission of Germany and that the British foreign secretary had declared it was impossible to conduct negotiations with a foreign minister came to Geneva with hard and fast instructions.

M. Unden, alluding to the strong position maintained by Britain and Israel for permanent place, pointed out that other countries seemed to have no objection to Sweden's position, but by voting only for Germany at the present moment, he was serving the highest interests of the league.

The Swedes assert that the allied powers, notably France, made a powerful bid, but not only the admission of Germany and Spain, but also Poland, although they did not insist upon Poland being secured a permanent seat.

**RED ROSE TEA**  
 "is good tea"  
 Next time try the finest grade  
 --Red Rose Orange Pkoe Tea.

**World Wide Reforms**

All world-wide reforms are slow of accomplishment because the people of the world are essentially conservative in their thought and action. It is perhaps well that this should be so, otherwise nations might be stampeded into the acceptance of untested theories and hastily conceived and ill-considered policies leaving loss, suffering and ruin in their wake.

But there is such a thing as being too ultra-conservative, and so bound by old-time precedent and usage that wise progress and sane advancement is made extremely difficult and for long years impossible. Such extreme conservatism is baneful. Danger there may be from the optimistic reformer who urges his pet theory or scheme as a "cure-all" for the ills from which mankind and the body politic may suffer, and as the key which will open the door to Utopia. But there is equal danger from the chronic pessimist who scoffs at everything new and declares "It won't work."

For a long time there have been advocates of a reform of the system of currency in Great Britain, and of the systems of weights and measures in Great Britain, Canada, United States and some other countries. These advocates have consistently and persistently urged the adoption of the decimal and metric systems. They have carried on a work of education which apparently is going to bear fruit. In Canada, a bill has been taken, both in Britain and the United States, of the growing strength of the demand for reform in these matters.

Great Britain, with its world-wide trade and commerce, cannot afford in these days of rapid communication and transportation, and intense world competition, to cling to its present archaic system of pounds, shillings and pence, when all the other great trading nations have adopted the decimal system.

Nor should Canada and the United States continue to adhere to their equally out-dated systems of weights and measures with twelve inches to a foot, three feet to a yard, 1,760 yards to a mile, two pints to a quart, four quarts to a gallon, but in the United States, ounces, pounds, pecks, barrels, tons, etc., with avoirdupois and Troy weights.

The adoption of the metric system of weights and measures would enormously simplify not only all international commerce but our own domestic business as well. Soldiers of all nations serving in France soon discovered how simple and easily understood is this metric system, and undoubtedly their experience and knowledge is having its effect in influencing the more pronounced agitation for this reform which is in evidence throughout the world.

Another question which is coming to the front is the reform of the calendar. Interested as it is in the removal of all causes of misunderstanding, and in promoting the most friendly internationalism, the League of Nations is taking an active part in connection with these reform movements, and at the present time one of its committees is giving consideration to numerous plans submitted to it, providing for a reform of the calendar. One of the few plans reserved for further study out of the large number submitted is by a Canadian, and provides for a year of thirteen months, each of 28 days. Under this plan the first day of each month would be a Sunday. The present names of the months would be continued, but a new month created at the end of the half of the year, there would be one day at the end of the year to be known as "Year Day." The convenience of having all months of equal length, and of having the days of the week always falling on the same dates, can hardly be overestimated.

There would naturally and inevitably be some confusion at first during the short period of readjustment from the present time-honored system and customs to the new, but the admittedly great economic gains and conveniences which would result from these proposed changes would surely far outweigh the temporary inconvenience.

Canada led the world in adopting the new universal system of standard time under which the globe is mapped out in zones within which the time is uniform. Canada, like the United States, has a decimal monetary system. Why should the Dominion not lead the way on this continent at least by adopting the metric system of weights and measures, and also through the weight of its influence into the scale in favor of a reform of the calendar?

**Falls Her To Fortune**

Orphaned at the age of five, a bride of 16, a scrubwoman at 17, tolling for a meagre wage to augment the small pay earned by her husband, Rose Campbell, 17 Madison, Wis., now sees the world at her feet.

She has fallen heir to \$750,000. An uncle she never knew, John Randall, died recently at Indiana Harbor, Indiana, leaving an estate of \$750,000 without a will and without known relatives except Rose Campbell.

Her husband, Michael, is a sign painter.

Customer: Why does that dot all there and watch me all the time? Walter: I suppose you have the plate be always out from.

**Says Lloyd George Has No Political Future**

Will Never Unite Liberal Party Opinion of Sir Henry Lynd.

Mr. Lloyd George has no future as a politician, according to the opinion of Sir Henry Lynd, British traveler, former M.P., religious journalist and philanthropist, whose renunciation of his private fortune he devoted to promoting unity in the churches and peace among the nations of the world was announced recently.

Sir Henry gave as his opinion that Mr. Lloyd George is never likely to unite the Liberal party.

It's a great pity that men can't find an insurance company willing to take risks on their air castles.

 To avoid imitations, always look for the signature of **W. D. FLETCHER** on every direction on each package. Physicians everywhere recommend it.

**New Steel Takes Razor Edge**

Modern Progress Developed By Ohio Man Is Hard, Yet Pleasant

Many of the qualities of the celebrated Damascus steel are now being combined in a modern product which an Ohio man has developed by a secret process. It combines iron and carbon in such a way that the resulting steel will bend, keep an edge of razor sharpness, is tough and can be drawn through other steels without breaking. A bar of the material, fifteen inches long, was tempered to five different degrees, one end of it being hard enough to cut glass, a section hard as a razor and would cut a dry hair without honing or stropping, while other parts in the same bar would cut off a spike under blows of a hammer, would spring or could be bent backward and forward with the thumb and forefinger without breaking. Vanadium is an important element used in the preparation of the steel.—Popular Mechanics.

**"DIAMOND DYES" COLOR THINGS NEW**

Just Dip To Tint or Boil To Dye

Each 15-cent package contains directions for coloring a woman can tint soft, delicate shades of dye rich, permanent colors in lingerie, silks, ribbons, aprons, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist you want color in wool or silk, or whether it is linen, cotton or mixed goods.

**Through Service For Steamship Passengers**

Canadian Pacific Railway Inaugurates Through Tourist Sleeping Car Service

For the convenience of western passengers enroute to the Old Country the Canadian Pacific Railway have inaugurated a through tourist sleeping car service from Winnipeg to Saint John, N.B.

This car will leave Winnipeg on Tuesday, April 20th, providing through service to the ship's side at Saint John.

This service will prove extremely popular with passengers from the prairie provinces, eliminating as it does, changing trains at Montreal.

**Oil Flame Burns In Water**

Remarkable Discovery Has Been Made By Belgian Scientist

A Belgian scientist has succeeded in discovering an oil flame that will burn for weeks submerged in water without going out, and by which most of the heat loss of an ordinary boiler is avoided. A device similar to a carburetor blows a spray of crude oil mixed with air into the burner under pressure. Water is kept out of the burner until the flame is well started, and then allowed to rise around the flame and cover it. The inventor is said to have obtained almost perfect efficiency by putting the flame directly into the water.

**Want Designs For Cenotaph**

Fund For Prince Albert War Memorial Is Now Complete

The Prince Albert War Memorial Association has decided to go ahead with the selection of designs for a \$100,000 memorial to be erected in the city, which is to be unveiled and dedicated next November 11th. The association is inviting Canadian sculptors to submit designs without delay. The amount required has been raised by voluntary subscription and the memorial is to occupy a commanding position in Victoria Park, on the summit of the hill which overlooks the city from the south.

**Wedding Gown of Banknotes**

The reign of prosperity in the rubber planted areas of the Dutch East Indies, resulting from the high price of that product, has brought on a wealth wave among the natives. The Bureau Post tells of the wedding of the daughter of a native rubber king, in which the bride's gown was made entirely of Dutch banknotes, sewn together and cut wherever necessary, regardless of their value.

**Could Stand Greater Unity**

Canada and Australia Not As Intimate As They Should Be

Every dominion within the British empire will join in congratulating the Australian Commonwealth upon the 125th anniversary of the establishment of the British Government on the island continent. Although Captain Cook first raised the Union Jack on Australia's territory in 1770, thus taking the first possession of the unknown land, it was not until eighteen years later that British rule was formally set up in 1789. From the solemn beginning of a penal settlement for poor wretches sentenced to transportation, Australia has grown to be a self-governing dominion of states, paying its way, progressing steadily towards definite ideals, upholding rigidly British standards of justice and right, and yet developing a strong national spirit.

The relations between Australia and Canada have not been so close or intimate as they might have been. Both countries are to be blame in varying degrees for this. We are Australia's nearest neighbor within the empire looking eastward. We are her eastern link with the centre of the empire. The closer Canada and Australia draw together, the stronger the empire becomes by fast linking up. Though each nation has its own individual national aspirations and each its own destiny to achieve, there are many directions in which the two can walk together—Montreal Star.

**To Aid Starving Indians**

Royal Canadian Mounted Police Leave For Far North With Provisions

A detachment of the Royal Canadian Mounted Police left Fort Smith recently on a long trek into the Barren Lands in an effort to save a band of Eskimos from death by starvation.

Word reached Fort Smith of the plight of the natives and Corporal Laidlaw, in command of the detachment, and a special constable, left with two Indian dog team drivers. A large quantity of food was carried on the sleds. The location of the band of starving caribou eaters is believed to be 250 miles northwest in the Barren Lands.

**Indian Killed In Jump From Aeroplane**

Trying Stunts With Parachutes But One Failed To Open

Jack Miller, an Indian, at Santa Monica, Cal., is dead as a result of jumping from an aeroplane with his parachute, intending to use them one by one, until he had discarded all but the last one.

He successfully cut loose from three parachutes, but when he cast away from the fourth he was so close to the ground that the next one failed to open. He fell 100 feet, sustaining injuries from which he died.

**Asthma No Longer Dreaded**

The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that they can rely on it as a cure on this true specific with the certainty that it will always do all that its users claim. If you have not yet learned how safe you are with this preparation, try it today and know for yourself.

**Date Not Yet Fixed**

Correspondence in regard to the next imperial conference has been passing between the British and Dominion Governments. The date suggested for the conference, it is understood, is at the end of October, but so far as can be ascertained, there has not yet been a definite agreement.

Internal parasites in the shape of worms in the stomach and bowels of physical development. They keep the child in a constant state of unrest, and do not allow the enduranc of the child can be spared much suffering and much more much anxiety by a reliable worm remedy, such as Miller's Worm Powders, which are sure to destroy worms.

**Plan Spanish-American Air Line**

Schulte Frohndle, chief director of the Italian branch of the German Dornier Metal Aeroplanes Company, has arrived at Madrid to organize a regular mail and passenger service between Spain and the Americas.

**King Fuad to Visit London**

King Fuad has accepted an invitation from King George to visit London. He hopes to make the trip early in June, after the opening of the Egyptian Parliament.

Corns are painful growths. Holloway's Corn Remover will remove them.

"Do you believe in fate?" he whispered, as she moved a little closer to him. "Well," she answered, "not exactly, but I do know that what's going to happen will happen."

**From Rome To Washington By Auto**

Ambitious Plan of Italian Engineer May Be Put Into Effect

Anton Dalai, an Italian engineer, with the support of the Italian Government, announces he will attempt the unusual—a motor car trip from Rome to Washington.

Dalai's plan read as a page from Jules Verne. He announces that he has invented an amphibious motor car, which will be able to navigate rivers and not too stormy seas. The intrepid Italian plans to start his venturesome journey from Venice, going to Trieste, then to Constantinople, Trebizond, India, Burma, Indo-China, China, Japan and Vladivostok.

From Vladivostok, Dalai plans to head his amphibious automobile for the Behring Straits and leaving there, Winnipeg, Chicago, Cleveland, Buffalo, New York, Philadelphia and Washington. Date for the departure has not yet been set.

**A Clever Answer**

A newspaper publisher offered a prize for the best answer to the conundrum, "Why is a newspaper like a woman." The prize was won by a lady who sent in this answer: "Because every man should have one, and every man who does not has a neighbor."

"Don't think that because a soft answer turns away wrath that it will work the same way with a book agent."

## National Aspect of Problems of Canadian Farmers

President of Canadian Council of Agriculture, at Annual Meeting in  
Regina, Reviews Work and Organization of Council and  
Answers Recent Attacks.

In opening the annual meeting of the Canadian Council of Agriculture at Regina on February 24th, the President, W. A. Ames, who is also President of the United Farmers of Ontario, briefly reviewed the work and organization of the Council, and vigorously repelled some recent attacks made upon it.

"The Council," said Mr. Ames, "has performed a great service for the farmers in Canada. Financially it has saved or secured for them in the price received for their grain and other produce in transportation charges, and in other ways, hundreds of millions of dollars. Educationally it has stimulated their thought and provided them with material for study which has enabled them to become better farmers, better neighbors, and better citizens.

"Political organization it gave in 1921 a bid which resulted in agriculture for the first time coming anything like adequate representation in the Canadian Parliament, and to introducing higher ideals and higher standards into the public life of the country. In a brief way it has been instrumental in securing the enactment of such measures as will ameliorate social and economic conditions and will make for a better citizenship.

"Its record of achievement therefore speaks for itself and I would like to ask those who have persistently criticized the Council and its membership what they have accomplished which will in any measure compare with it.

"The necessity for a farmers' organization, such as the Canadian Council of Agriculture, is constantly being demonstrated. Most of the larger problems which confront the agricultural industry and whose solution is necessary to agricultural prosperity, are of a national or at least an inter-provincial character. Transportation questions, freight, freight, express, lake and ocean rates, the various tariffs and other forms of foreign taxation, the banking, currency and financial systems of the country, the regulation of the grain trade, of the livestock industry, and of other branches of agriculture, the commercial relations of Canada with other countries involving markets for agricultural products, and legislation, government administration generally. In all these things the interests of the farmers in every province of Canada are usually forced to be identical.

"The membership at the present time consists of the United Farmers of Quebec, the United Farmers of Ontario, the United Farmers of Manitoba, the Saskatchewan Grain Growers' Association, the Grain Growers' Guide, the United Farmers of Alberta, Saskatchewan, the United Farmers of Ontario Cooperative Company. At meetings of the Council each of the companies is represented by representatives consisting of its executives or their appointees. In addition, the provincial associations are also represented by representatives on at least of whom must be a woman.

## Local and General

Found—Crank for car. Ap-  
ply at Chronicle office.

Mrs. Geo. Orr was a tea hos-  
tes on Thursday afternoon.

Found—Left hand suede  
glove. Owner call at Chronicle  
office.

Don't forget the St. Patrick's  
tea on Saturday afternoon from  
3 to 7 o'clock.

A. Kramer has disposed of  
several Hudson cars in this  
vicinity.

H. Theriault was taken ill on  
Wednesday and is confined to  
the house.

F. R. Freeze, of Calgary, was

STEAM HEATED

ELECTRIC LIGHTED

Ford has proved that low  
prices increase consumption.  
Automobile density in Canada  
at present is on par to 14 of our  
population—in the United  
States the density is one to 6.  
The main cause of this difference  
is the lower price of cars which  
on the American side of the  
line. Increase in the number  
of cars means an increase in  
the number of garages—an in-  
creased demand for supplies—  
an added volume of business.  
Who can doubt but that the  
increased use of cars would in-  
crease and greatly increase the  
total volume of employment in  
Canada.
